Jhoan Camilo Acosta Galindez

ha completado correctamente el Certificado profesional en línea

IBM Relational Database Administrator with GenAI

Holders of this Professional Certificate have demonstrated their proficiency in aspects of database administration, including database design, security, SQL querying, managing backups, process automation, and performance tuning. They also showcased their Python skills in a real-world data engineering project. Throughout the program, badge earners gained hands-on experience using essential tools and techniques for database management platforms like MySQL and PostgreSQL, data processing using Python, shell scripting using Linux, and pipeline design using Apache Airflow. They can apply these skills to manage, secure, and optimize relational databases. This certification highlights their readiness for roles in database administration, data engineering, and related fields.
